### Corrigendum

## Corrigendum to “The role of test-retest reliability in measuring individual and group differences” [Journal of Neuroscience Methods 274 (2016) 81–93]

Kenneth Paap<sup>a,\*</sup>, Oliver Sawi<sup>b</sup>

<sup>a</sup> San Francisco State University

<sup>b</sup> University of Connecticut

On page 87 we stated that “our Day 1 flanker effect ( $M=83$ ,  $SD=26$ ) was greater than that of Wöstman et al.’s ( $M=32$ ,  $SD=32$ ).” The correct mean for Wöstmann et al.’s flanker effect was  $M=58.5$  ms

not 32 ms as we reported. The authors would like to apologize for any inconvenience caused.
